

Dark Flipout Starter Pack

Lead Magnet Preview | DarkOne

Welcome from DarkOne

You are holding the preview of the Dark Flipout Starter Pack. Five lab projects, firmware flash reference, and Legion prompt teasers. Everything here is for educational security research on systems you own or have written permission to test.

What's in the Full \$49 Pack

- Complete build guides for all 5 projects
- lab_wifi_mapper.ino and lab automation scripts
- Bambu Flipper Sled STL + print profile
- Marauder CSV parser and network map tools
- 100 Legion prompts (Forge, Venom, Overlord, Reaper)
- Firmware partition maps, backup, and recovery cheat sheet

Legal Disclaimer

READ BEFORE PURCHASE OR USE

All Dark Flipout products, firmware guides, scripts, 3D models, courses, and community content are provided strictly for educational purposes and authorized security research only.

You Agree That You Will:

- Test only systems, networks, and devices you own or have explicit written permission to assess
- Comply with all applicable local, state, federal, and international laws (including FCC Part 15, CFAA, Computer Misuse Act, etc.)
- Use RF tools only on licensed frequencies or in shielded RF labs with proper authorization
- Not use any material to intercept communications, bypass authentication on third-party systems, jam signals, or cause harm

You Agree That You Will NOT:

- Deploy firmware mods, scripts, or hardware against targets without authorization
- Distribute pre-flashed devices configured for unauthorized access
- Market or resell Dark Flipout materials as "hacking tools" for illegal use
- Hold DarkOne, Dark Flipout, or affiliates liable for misuse

Product Scope

| Included | Not Included |

|-----|-----|

| Lab setup guides | Weaponized exploit packs |

| Open-source firmware links + flash workflows | Pre-configured attack payloads for live targets |

| 3D enclosure STL files | Covert surveillance kits |

| AI prompt frameworks for defensive research | Credential theft / fraud tooling |

| Authorized pentest checklists | Jamming / illegal transmit configs |

Dark Flipout Starter Pack v2.0 | Educational / Authorized Lab Only

By purchasing or downloading, you accept full responsibility for compliance.

Contact: legal@darkflipout.com (placeholder - configure before launch)

Project 1: Transparent Case Lab Build

Time: 2-4 hours | Cost: ~\$15 filament

Goal: Document a clean transparent case mod with cable routing and ESP32 dock.

- Inventory: case, board, USB-C passthrough, M2 screws
- Dry-fit ESP32 deck STL (full pack sample)
- Photo checklist for content (before/after, macro shots)
- Label ports with content-ready naming convention

Legal note: Modifying hardware you own for lab use is fine. Resale of modded devices may require compliance review.

Project 2: ESP32 WiFi RSSI Mapper (Lab Only)

Stack: ESP32 + Arduino/PlatformIO

Scope: Map signal strength in your home lab only.

- scripts/lab_wifi_mapper.ino (included in bundle)
- Serial plotter setup
- CSV export for reports

Project 3: Bambu Flipper Sled

Printer: Bambu X1C / P1S recommended | Material: PETG smoke, 0.2mm, 15% gyroid

Setting	Value
Nozzle	0.4mm
Layer	0.2mm
Infill	15% gyroid
Plate	Textured PEI
Brim	8mm

Project 4: Marauder Read-Only Site Survey

Prerequisite: ESP32 Marauder on your dev board.

Lab exercise: Passive SSID survey in shielded box or owned property.

- No deauth
- No probe flood against neighbor networks
- Log to SD, export CSV, write 1-page findings template

Project 5: Quest 3 Lab HUD Mock

Tool: Unity + Meta XR SDK (skeleton in Operator Kit)

Starter exercise: Display static lab stats (temp, uptime, node count) from mock JSON.

Firmware Flash Quick Reference (Teaser)

Firmware	Device	Risk	Lab Use
RogueMaster	Flipper-class	Medium	Custom UI, lab plugins
Marauder	ESP32	Medium	WiFi/BT survey
Momentum	Variant boards	Medium	Check hardware matrix

Full pack includes: partition maps, backup steps, recovery GPIO cheat sheet.

3 Sample Legion Prompts

DF-001 Lab Flash Workflow

You are Forge, Dark Flipout build agent. I own this device and use it only in my lab.
Output: prerequisites, backup, flash steps, rollback, disclaimer footer.
Refuse unauthorized targeting, deauth, or jamming.

DF-003 60-Second TikTok Script (Venom) | DF-007 Gumroad Listing Optimizer (Overlord)

Full prompt text: prompts/legion_starter_3.md in bundle.

Upgrade

Ready for scripts, STLs, Quest project, and 100 prompts?

Operator Kit - \$199 -> darkflipout.com/kit

Starter Pack - \$49 -> darkflipout.com/starter
